BLOODY VALOR

The Attacker and Defender will face each other by either **taunting**, **provoking**, or **mocking**. When the Attacker either wins or the Bloody Valor ends with a draw, various effects will kick into play, so read your opponent and make the right call.

Each action you take has an advantage and disadvantage against each other action. Regardless of the choice, one will come out as victor.

If the Attacker wins, their **Valor Level** will go up by 1, and Bloody Valor will continue. This continues until your **Valor Level** reaches max, so you can gain a great advantage the more you win during Bloody Valor.

※Your Valor Level maxes out at 3.
